

PLASTICS VOLUNTEER COORDINATORS REPORT 2016

During 2016 the plastic recycling through the Magelake collection centre has sent 2200kg of film type plastic to Devon Contract Waste who ensure none of it goes into landfill.

The local residents who bring their plastic film to the centre should be thanked for their contribution. Most of the film they provide is clean and acceptable for recycling. Unfortunately we occasionally receive material that is neither clean nor suitable for recycling. This is disappointing for our volunteers when they find it but fortunately that is not too often.

The compacting machine is now only used every two or three weeks and has performed well during the year.

Our grateful thanks go to all our volunteers; Roger Norton, Pam Golding, Michael Ewings & Tim Ponting.
